

QUALITY ABRASIVES THAT GIVES YOU CONFIDENCE

VOGEL 4" FLEXIBLE GRINDING DISC - 100 x 3 x 16 mm

FLEXIBLE 4 INCH DISC FOR GRINDING ON STANDARD AND CURVED SURFACES

Our flexible 4 inch grinding disc measures 100x3x16 mm, and is the perfect product for difficult grinding operations on curved surfaces requiring a high level of finish. Vogel 100×3 has a moderate level of flexibility which makes it a great choice for finishing metal surfaces, grinding corners, and curved surfaces. With a high level of attack and with a optimal balance between aggression and disc life, Vogel 100×3 is a favourite amongst metal workers looking for a highly versatile grinding disc.

Vogel 100×3 grinding disc is especially suited for use on steel and stainless steel, in all major surface grinding applications, particularly those on curved surfaces.

This product has a depressed centre and can be used with most standard handheld angle grinders.

PROPERTIES

- Moderate level of flexibility
- High level of finish
- Engineered with focus on safety
- Suited for use on metals, especially on steel and stainless steel

Model	: AC80BFL
Dimensions (mm)	: 103 x 3 x 16 (diameter, thickness, bore diameter)
Dimensions (inches)	: 4" x 3/32" x 5/8"
Centre	: Depressed
Max. RPM	: 13,700
Grain	: Special aluminium oxide and silicon carbide
Grit	: 80
Application	: Suitable for metals; steel and stainless steel
Packaging	: 50 pcs / box
