

PROFESSIONAL CONSTRUCTION & INDUSTRIAL PRODUCTS

SOUDAPLUG ST

ULTRA-RAPID SETTING CEMENT MORTAR

For the immediate plugging of leaks in concrete and masonry, even under high pressure.

PROPERTIES

- Pre-packed; just mix with clean water
- Ultra-rapid setting
- Stops running water instantly
- Cement-based; perfectly compatible with concrete and masonry
- Equipment can be cleaned with water
- Non-corrosive to steel rebars
- Can be applied underwater

APPLICATIONS

- For stopping active water leaks and infiltrations, even under high water pressure.
- To plug joints, cracks, construction defects and holes in all structures made from concrete, masonry or stone.
- To securely anchor bolts and fasteners.

APPLICATION INSTRUCTIONS

- Mix Soudaplug ST in a rubber or plastic bowl. Add water to the dry powder during intensive, fast mixing by hand and work this into a putty consistency.
- Mould the material in your hand into an appropriate form until slight warmth is felt. Press the material now firmly into the opening that needs to be plugged without moving and continue to exert pressure until the mortar is hard. Surplus material can be trimmed off with a trowel when the material has not yet become completely hard.
- See technical data sheet.

Consumption

1.7 kg / dm³

PACKAGING

1 kg bucket

COLOUR

Grey

ULTRA-RAPID

STOPS LEAKS INSTANTLY
